|                |                      |                    |                         |  |
|----------------|----------------------|--------------------|-------------------------|--|
| Equipment used | Hydrajaws 2000       | Calibrated Y/N     | Yes                     |  |
| Engineers name | Mr P Minger          | Date of test       | Monday, 7 November 2022 |  |
|                |                      | Recommend next     | 07/11/2025              |  |
| Client         | Lite                 | Certificate number | PME7897890              |  |
| Location       | Frodsham Town Centre |                    |                         |  |

**Anchor Point Testing**

| Date         | Location                            | New/<br>Existing | Load<br>applied | Pass/<br>Fail | Fixing<br>Number | Inspection notes  |
|--------------|-------------------------------------|------------------|-----------------|---------------|------------------|---|
| 07/11/<br>22 | Red Lion, 17, High street, Frodsham | Existing         | 3KN             | Pass          | HS 1             | Anchor at Red Lion good, but the catenary goes to a very poor column fastening between 9&11     |
| 07/11/<br>22 | Morrisons, High Street 1st Anchor   | Existing         | 3KN             | Pass          | HS 2             | Turnbuckle corroded at column but good anchor   |
| 7/11/2<br>2  | Morrisons, High Street 2nd Anchor   | Existing         | 3KN             | Pass          | HS 3             | Good  |
| 07/11/<br>22 | Bakery 1st Anchor                   | Existing         | 3KN             | Pass          | HS 4             | Passed the pull out test but visually looks partly pulled out, probably been that way for years |
